1. This is a response to Applicant's response filed on 1/08/2007. In virtue of this amendment, claims 1-9 remain pending in this application which adding the news claims 7-9. Claims 1-6 are allowed.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and /or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.3.12. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The following claim has been amended upon agreement by applicant during a telephone conversation with Stanley P. Fisher and Jennifer Teng on 3/12/2007.

Cancel claims 7-9

The following is the claim 1's amendment:

1. (Currently Amended) A document search system for the retrieval of documents related to a search key, comprising:

a database in which terms, corresponding meanings, relevance between the meanings, and relevance between the terms with respect to each corresponding meaning are stored;

a search key input unit for entering by a user a first term as a search key;

a meaning-relation network presenting unit by which a plurality of different meanings of said search key and a second term related to each of said meanings of said search key are extracted from the database and presented in a form of a network;

a meaning selecting means for selecting by the user at least one meaning of the first term in the network presented by the meaning-relation network presenting unit;

a search unit conducting a document search using said search key;

a meaning determination unit for determining a meaning of the search key used in a searched document by the search unit, by referring to the database; and

a filtering unit selecting a document from a set of searched documents as determined by the meaning determination unit in which said search key is used with said at least one meaning selected by the meaning selecting means,

wherein the first term and each of said different meanings are paired and displayed side by side as one first node in the network,

said second term is displayed as a second node linked to said first node via a line in the network, and

said second term and a meaning of the second term are paired and displayed side by side as said second node in the network.

Reasons for Allowance

4. Claims 1-6 are allowed.

The following is an examiner's statement of reason for allowance:

With respect to claims 1-6, none of the references of record teaches or suggests the claimed the claimed a document search system for the retrieval of documents related to a search key, comprising, along with all the other claimed feature, a database in which term; a search key; a meaning-relation network presenting unit by which a plurality of different meanings of said search key and **a second term related** to each of meaning of said search key are extracted from the database and presented in a form of a network; a meaning selecting means; a meaning determination unit; a filtering unit selecting a document from a set of searched documents as determined by the meaning determination unit in which said search key is used with said at least one meaning selected by the meaning selecting means, wherein the first term and each of said
